

# Investment Projects

We advise foreign investors and domestic companies receiving foreign investment. We have supported many foreign clients in obtaining their investment certificates in Vietnam: including offshore companies, joint ventures and domestic corporations operating across diverse business industries. We understand the requirements of investors, financiers and key stakeholders in large-scale **investment projects**. Drawing on our transactional capability, our relationships and our broad expertise across matters of finance, corporate, tax, and investment law, we assist clients in structuring, acquiring, financing and implementing projects and managing investments in Vietnam at every stage.

Our team focuses on:

- ▶ Due diligence of the investors
- ▶ Consultation on and preparation/submission of the 'dossiers' required for foreign investment projects
- ▶ Advice on the implementation of investment projects after licensing, and on legal issues arising from such implementation
- ▶ Advice on the management of investment projects
- ▶ Advice on project transfers, including licensing procedures
