

## Enterprise management

 We provide customized solutions to our clients, based on their **enterprise management** needs, to enable them to concentrate on their core business.

We are available to handle legal matters arising at all stages of a company's existence, from inception to closure; our services range from company formation and advice on **investment projects, taxation, IP** and compliance, to support on M&A, reorganization and reconstruction, dispute resolution, liquidation and winding-up.

Our experience includes assisting clients in structuring deals in compliance with all applicable laws and regulations; and conducting detailed due diligence exercises in preparation for proposed transactions. We also routinely assist clients in negotiating contracts and finalizing transactional and other business documentation, including industry-specific documents.
